ABOUT DESERT POTTERY MANUFACTURING

Desert Pottery Manufacturing is a Dubai-based company that's a part of Desert Group LLC. We bring along with us over 3 decades of experience when it comes to anything related to plants. Here you're sure to find the right planter to suit your vision with our large collection of modern, stylish, and aesthetic planters and pots in various sizes and shapes, including customizable pots.

WHAT DO WE HAVE TO OFFER?

In addition to our ever-growing range of pots and planters, we also offer an array of unique colors, sizes & shapes, so that our clients can create spaces that are unique to them and showcase their visions. The pots and planters we offer are high quality and available in a variety of colors and finishes, many of which are manufactured right here in the United Arab Emirates. The ability to manufacture high-quality bespoke glass-fiber reinforced plastic (GRP) planters of international standards is our strongest USP.

WHY CHOOSE OUR GRP POTS FOR YOUR NEXT PROJECT?

In-house Quality Control

As part of our manufacturing process, all quality checks are handled by us. In other words, there is no third party involved in the process, so we can guarantee the quality of our products without hesitation.

Made-to-Order Planters

In certain projects, tailored specifications are necessary, and we are ready to bring your concept to life. Our made-to-order planters are produced in our factory using the same high-quality materials as our standard planters, and they are all thoroughly inspected for quality.

A Motivated & Skilled Team

The core of our company structure revolves around product quality control throughout the manufacturing process. Our employees are experts at what they do and true artisans that take exceptional care of every pot and planter.

THE FINEST HANDMADE GRP PLANTERS THAT ARE MADE IN DUBAI

We take pride in our wide selection of planters, but we also understand that sometimes tailor-made specifications are necessary. We are proud to offer wholesale custom planters made from the same high-quality materials Desert Pottery Manufacturing is known for. As a landscape architect or wholesale distributor, you can count on us to deliver commercial-grade planters that meet the precise specifications of your project. The manufacturing techniques we use allow us to offer a wide range of sizes, shapes, and finish options. You can choose a planter design from our existing collection or tailor one that fits your need. No matter the route taken, you'll receive a beautiful and long-lasting piece that will complement your landscape vision. The best part is that our team will work with you from the initial concept through the production process and delivery. The result is a successful project every time.

WHY CHOOSE FIBERGLASS PLANTERS?

You may be tempted to cut costs by opting for less expensive plastic planters. However, plastic planters degrade when exposed to sunlight, so you'll lose money over time. Planter materials such as wood, terracotta, and metal are also susceptible to water damage and can fade, split, and crack over time. Overall, we believe fiberglass planters stack up favorably against some of the most popular planter materials.

Lightweight

Fiberglass is significantly lighter than concrete. 1 or 2 people can easily move a fiberglass planter, while a concrete planter of a similar size might require multiple people or even additional machinery. This helps to reduce freight costs and make the placement process easier.

Durable

Our GRP planters are made to last. Whether placed indoors or outdoors, our fiberglass plant containers are able to withstand adverse weather, foot traffic, UV rays and more while offering an attractive foundation to plant designs.

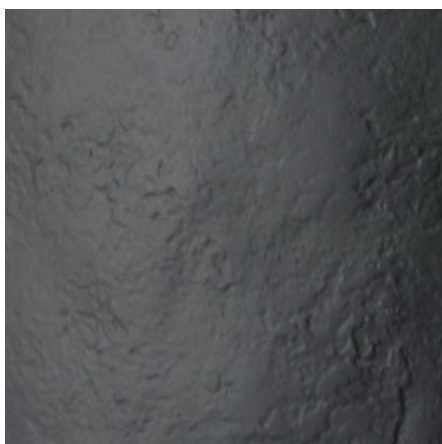

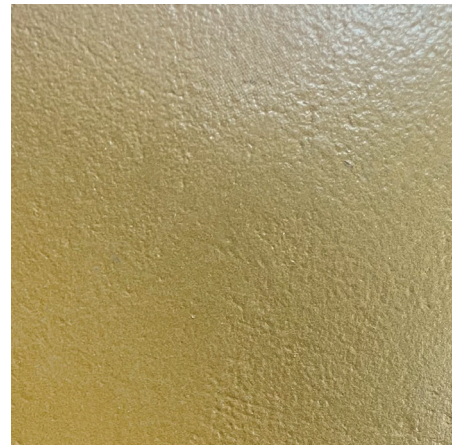

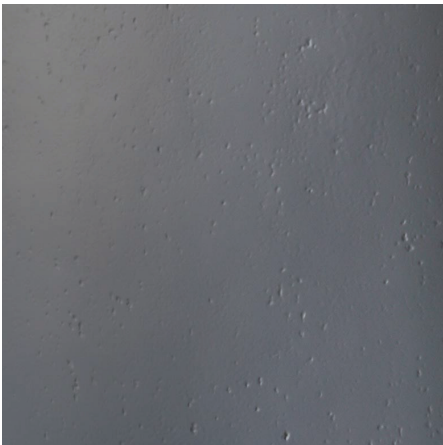

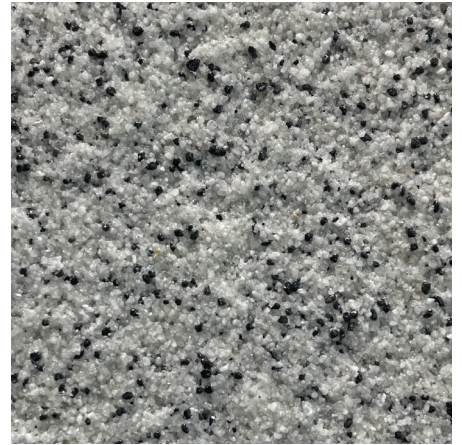

Watertight

Fiberglass boats keep water out and fiberglass planters keep water in – there is no additional waterproofing needed for the interiors. We test all of our planters before they're shipped to ensure they are of the highest quality and above all watertight!

**MATERIALS, FINISHES
& COLORS**

MATERIALS

Desert Pottery Manufacturing uses fiberglass material for its planters as it's durable & offers longevity. It has no limitations when it comes to size, shape, or finish, giving designers creative freedom to run wild with their imagination. Overall, it's corrosion-resistant, watertight, strong, robust, lightweight, and overall requires less maintenance.

STANDARD TEXTURES / FINISHES

Desert Pottery Manufacturing offers matte, glossy and paint finish options along with a GRP coating with gel coat.

GRP Gel Coat Finish
